

4th International Conference:
Life Cycle Assessment in the Agri-food sector
 October 6-8, 2003, Horsens, Denmark

Author	Country	Poster title
Assumpció Anton	Spain	LCA applied to Mediterranean greenhouse horticulture. Methodological limits? Simplifying LCA?
Assumpció Antón	Spain	Applying LCA to Waste Management in Greenhouse Tomato Production
Kerstin Bergström	Sweden	Utveckla och utvärdera effekterna av miljöinformation i storkhushålls- och grossistledet
Frank Brentrup	Germany	Methodological Contributions to tailor LCA to the Specifics of Arable Crop Production
Llorenc Milá i Canals	Spain	Sources of site-dependency and importance of energy consumption in agricultural LCA: apple production in New Zealand
Llorenc Milá i Canals	Spain	eLCA: website and database of IPP tools for SMEs in the agro-food sector
John Casey	Ireland	LIFE CYCLE ANALYSIS OF MILK PRODUCTION: A COMPARISON OF IRISH AND DUTCH SYSTEMS
Nieves Sanjuán Pellicer	Spain	LCA of the integrated production of oranges in the Comunidad Valenciana (Spain)
Imke de Boer	The Netherlands	Environmental impact assessment at commercial dairy farms
Martine Helms	The Netherlands	Predicting the future: comparing pork with Novel Protein Foods
Niels Jungbluth	Switzerland	Indicators for monitoring Environmental Relevant Trends of Food Consumption
Niels Jungbluth	Switzerland	Life cycle inventory modelling in the Swiss ecoinvent database
Juha-Matti Katajajuuri	Finland	LCA results and related improvement potentials for three different kind of foodstuff and two meals
Christopher J. Koroneos	Greece	Life cycle analysis of tomato paste production in Barrel (aseptic) and can packaging
Charlotte Lagerberg	Sweden	Designing and evaluating the impacts of environmental information in food service institutions and the food wholesale sector
Stewart F. Ledgard	New Zealand	Effects of intensification of dairy farming in New Zealand on whole-system resource use efficiency and environmental emissions
Marieke J.G. Meeusen	The Netherlands	“Simplified LCA for agro-products”
Sanderine Nonhebel	The Netherlands	The use of waste-streams from food industry as basis for livestock feed and the consequences for the analysis of the environmental impacts of meat consumption
Bruno Notarnicola	Italy	LCC of extra-virgin olive oil: organic vs. conventional
Klára Szita Tóth		LCA applications in a national research program in Hungary
Hayo M.G. Van der Werf	France	Procedures to improve scope definition and inventory analysis in LCAs of farming systems
Mirja Van Holderbeke	Belgium	The history of bread production: using LCA in the past
